

NO MATTER WHAT
THE FUTURE HOLDS

DATWYLER – FOR YOUR **FUTURE SUCCESS.**

The name Datwyler stands for excellence in sealing solutions. But, it also stands for creativity and drive, dependability and entrepreneurial spirit, and a passion for shared success with our customers. Our products and services enable you to successfully overcome the challenges of tomorrow and thus anticipate the future with confidence. Thanks to our technical knowledge and years of experience in material development and engineering, we are always able to find an individual yet cost-efficient approach – even for complex problems. Applying sophisticated development and production processes, our specialists manage to repeatedly raise the bar of technical feasibility.

Datwyler stands out with its distinct core competencies and its constant focus on clearly defined global market segments. In the Health Care, Automotive, Consumer Goods and Civil Engineering fields, we offer our customers advanced technological and process know-how, unique material expertise and global service. This combination makes Datwyler a preferred partner of global companies that aspire to sustainable growth.

EVERY **SUCCESS STORY** BEGINS
WITH **QUESTIONS ...**

“IS THERE **AN EFFICIENT WAY**
TO ADVANCE MY IDEA TO
LARGE-SCALE PRODUCTION?”

A man with glasses and a black sweater over a light blue shirt stands in an office, holding a blue cup. He is looking thoughtfully to the side. The background shows a desk with a red hard hat, stacks of papers, and a whiteboard with blueprints.

“IS THERE **A MATERIAL** THAT REMAINS LEAKPROOF EVEN FOR DECADES?”

“WHO CAN DELIVER **A PRODUCTION PROCESS** THAT I CAN ABSOLUTELY TRUST?”

“IS THERE **A BUSINESS PARTNER** WHO WILL SUPPORT ME AT ANY TIME AND PLACE?”

Every customer request requires an individual and differentiated response. That's why the specific solutions we develop for our partners span a wide spectrum – yet each is based on the same core competencies of Datwyler:

ENGINEERING

MATERIAL & SIMULATION EXPERTISE

PROCESSING QUALITY

GLOBAL SERVICES

A photograph of two men in a factory or industrial setting. Both men are wearing white hairnets. The man on the left is wearing a grey jacket over a light blue shirt and is pointing with a black pen at a large monitor. The man on the right is wearing a light grey short-sleeved shirt and is holding a black laptop. The monitor displays a technical drawing or data visualization. In the background, there is a red machine with a green emergency stop button and a brick wall.

“I CAN CONVERT EVERY GOOD IDEA INTO
EFFICIENT, LARGE-SCALE PRODUCTION.”

ENGINEERING

FOR INNOVATION THAT BRINGS
SUCCESS FOR THE LONG TERM.

Here at Datwyler, we possess a unique mix of knowledge and experience. Because our engineers, process technicians, and project managers come from a variety of scientific and technical fields, we can draw upon a multidisciplinary wealth of experience. This enables us to find the right solution for each task, working in a creative and interdisciplinary way, collaborating constructively with our customers, and meeting all the technological and commercial challenges – regardless of whether the goal is the production of a single component or the complete development of a comprehensive solution system.

"I CAN DEVELOP AN EVEN **BETTER MATERIAL** FOR THIS APPLICATION."

MATERIAL & SIMULATION EXPERTISE

TO ENSURE **SAFETY** IN EVERY REGARD.

We have been gathering experience with materials used for gaskets, seals and closures for many decades. Gained in a wide array of industries, this know-how is always specifically related to process engineering and application requirements. Based on this special expertise, we develop customized materials with extraordinary properties that meet the most rigorous requirements.

While sophisticated simulation processes allow rapid and cost-efficient development, defined test procedures in our in-house laboratories ensure maximum product quality. Characteristics like absolute chemical purity or special resistance properties allow our products to be used in a wide range of applications – for example, in seals for pharmaceutical products.

"I CAN BE CERTAIN THAT THE PRODUCTION PROCESS MEETS THE **HIGHEST STANDARDS.**"

PROCESSING QUALITY

TO MEET EVEN THE **HIGHEST QUALITY DEMANDS**, WITH NO COMPROMISE.

A zero-defect philosophy and the capability to produce high volumes are essential when manufacturing critical parts. Regardless of whether the need is for a conventionally made stopper for a medicinal vial or a high-performance component for a brake system, the solution is achieved through innovative process technologies and efficient production processes that meet the highest standards.

Our employees in research and production remain at the cutting edge in their fields. They know the latest technologies and have state-of-the-art infrastructure at their fingertips. They are also continually trained in the newest test methods and apply a zero-defect philosophy in their everyday work. From use of the latest cleanroom technology to automated monitoring with the most modern inspection systems, we at Datwyler know exactly which technology must be used to achieve the best results for our customers.

A man in a white shirt and red tie is pointing at a whiteboard with his right hand while holding a mobile phone to his ear with his left hand. He is looking intently at the whiteboard. The background is a blurred office setting.

“I CAN **SUPPORT OUR CUSTOMERS** –
ANYWHERE IN THE WORLD.”

GLOBAL SERVICES

REMOVING BARRIERS FOR **WORLDWIDE SUCCESS.**

Datwyler has in-house development, manufacturing and distribution capabilities in nearly all of the world's key economic regions. Thus, we are in the position to support our customers comprehensively and efficiently at their site. When business perspectives open in new markets for our partners, we further expand our presence and invest in joint growth. Our goal is to be there for our customers at every point along the entire value creation chain. That's why Global Service means more for us than just the development, production and supply of components. It means we offer our partners all the services necessary for successful global operation – from the planning and realization of production processes, including sourcing, to warehouse management and logistics.

OUR INDUSTRIES

WE CREATE **SOLUTIONS** FOR THESE INDUSTRIES.

Datwyler is the leading global supplier of both customer-specific sealing, closure and packaging solutions and standard components in the fields Health Care, Automotive, Consumer Goods and Civil Engineering. As a recognized development partner of many industry leaders, we know their technologies, their needs and their demands. We use this multi-industry know-how to benefit all of our customers – in the development and production of precision parts that make a critical contribution to the functioning of a wide variety of products.

HEALTH CARE
healthcare@datwyler.com

Datwyler enhances safety in health care with high-quality sealing solutions for the packaging and administration of medicines.

- Drug delivery systems
- Medical devices

AUTOMOTIVE
automotive@datwyler.com

Components by Datwyler provide maximum reliability and long service life in sophisticated brake systems and powertrain systems.

- Brake systems
- Fuel & powertrain

CONSUMER GOODS
consumergoods@datwyler.com

As an industrialization partner for the consumer goods industry, we transfer our customers' products from the preliminary phase to large-scale production and we ensure highly efficient, top-quality manufacturing processes.

- Capsules
- Customized containers
- Packaging solutions
- Liquid sealing applications

CIVIL ENGINEERING
civilengineering@datwyler.com

Heavy-duty seals by Datwyler provide the necessary safety margins for challenging construction projects.

- Tunnelling
- Building construction
- Civil infrastructure
- Industrial applications
- Track superstructure

OUR VALUES

100 YEARS OF **FUTURE SECURITY.**

Healthy and sustainable growth for the benefit of our employees, customers and shareholders – this has distinguished Datwyler for nearly 100 years. Our success story began with a small cable and rubber factory in Central Switzerland, which Adolf Dätwyler took over in 1915. From the very beginning, our corporate founder provided the right solutions for the needs of the times. With a visionary drive, he managed to expand his company and keep it aligned with the ever-changing market.

Adolf Dätwyler took carefully considered, far-sighted management decisions. He placed great value on responsible business conduct: He treated his colleagues with honesty and directness, and shared his successes as a complete matter of course. He highly respected every employee, which made him a revered patron – and his fairness with business partners made him a successful entrepreneur. These values continue to characterize Datwyler to this day. They are the basis of our success.

WE ARE **ENTREPRENEURS**

WE BRING ADDED **VALUE** TO OUR CUSTOMERS

WE STRIVE FOR **EXCELLENCE**

WE HAVE **RESPECT** FOR OTHERS

SUSTAINABILITY IS PART OF OUR STRATEGY.

As we strive for growth and success, we also strive for greater responsibility and environmental awareness in all that we do. That's why sustainability has always been an integral part of the long-term business strategy of Datwyler. Examples of our commitment include membership in the UN Global Compact programme, our global Code of Conduct and our Sustainability Report, created in conformance with Global Reporting Initiative guidelines and published periodically.
